

## ABSTRACT

G-IIC-243

MASON-DIXON LINE: MILESTONE NO. ---(198) 1767 (mound site); 1902 (monument)  
Springs, Pennsylvania vicinity  
Public/private

Milestone No. ---(198) and its mound site mark Mason and Dixon's 180th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland. It is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 12 inches above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the site was originally surveyed and marked with a cairn), and 1902 on the west side (when the new monument was added to the center of the remains of the cairn during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, replacing the original wood post, by then no longer in evidence). On the national and state levels, No. ---(198) and its mound site are significant primarily as being among the thematic group series of some 248 markers still visually defining the West Line. Locally, as among the some 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.

---

Milestone No. --- (198), and its mound of earth (no longer visible), mark a point 180 miles west of the northeast corner of Maryland, the beginning of Mason and Dixon's 230.228-mile West Line. The monument was a new dressed Cockeysville marble post with a low pyramidal top when added to the mound in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 12 inches above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when originally surveyed and marked with a cairn), and 1902 on the west side. The mound, noted in the 1900-03 Resurvey, is no longer discernible.

The area here is one of the high/<sup>eastern</sup>foothills of Negro Mountain (elevation at site about 2600 feet), densely forested. The site is within Election District 3 of Garrett County, MD, and Elk Lick Township of Somerset County, PA; about 1¼ miles southwest of the village of Springs, PA; about 2 miles northwest of the town of Grantsville, MD; about ½ mile west of Big Shade Run and about 1350 feet about 200 feet south of the new pipeline; and about midway in west of Posey Row Road at the line; at the north edge of a cleared field framed by deciduous woods on the east-north-west sides, about 1 foot north of an east-west barbed wire fence, and wood fencepost. It cannot be seen from any road or the pipeline, but easily from the field, and seems protected by the post and fencing.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill to visually reestablish the Maryland-Pennsylvania boundary, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called magnesian limestone or saccharoidal dolomite; was originally cut about 10 inches square by about 4½ feet long, intended for setting about 1½ feet above ground with the remaining 3 feet for setting into the ground, thus eliminating the need for a concrete foundation. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are all clear and intact, with only a few nicks along the vertical edges and mottled darkening of the top (and some on the four sides) by lichen.

(see Thematic Group National Register nomination form for further descriptions of original Mason and Dixon cairns and the monuments set by the Resurvey in 1902)
